

Votive Candle Gift

Set your printer to print off these sheets at 'Actual Size'

What you will need to recreate this project:

Small Votive Candle (diameter 4cm, height 4.6cm)

A4 sheet decorative card

Tacky glue

Length of ribbon

2 paper flowers/flower dies/flower punches

2 medium half pearls

How to assemble the project:

Cut out the template on the following page & with your decorative card face down on your work surface, transfer the template. Before cutting out, score in the lines as indicated by the blue perforated lines.

From the scraps of card cut a strip to wrap around your candle, & also two paper flowers to decorate the candle band with. Attach these to your candle as shown in the main picture above.

Fold & firmly crease all of the scored lines on your work using a bone folder, or the tip of a ruler.

Turn the work decorative side up & apply Tacky glue to the flaps I have indicated on the template using grey highlights. Fold up the box & secure one corner at a time, making sure that the corners form a true 90° angle.

Lay your decorated candle inside the box so that the person opening the box will see the flower & decorative band immediately.

Wrap with a length of ribbon tied off with a bow on top.

Decorate the box if you wish.
