

A Year in Cards

The envelopes

What you need to finish off the project:

12 x C6 envelopes (the ones with a triangular flap look best but any will do)

Minimum 11 x 16cm embossing folder/s
Die cut/embossing machine

How to emboss envelope flaps

Embossing the flap of envelopes is a very easy process, whether it is the straight cut horizontal flap or the triangular flap.

Open up the embossing folder & slip the flap of the envelope inside, close the embossing folder & fold the rest of the envelope to the back, beneath the folder as it goes through the machine, this way the folder protects the envelope body from picking up marks from the machines plates or rollers.

If you have three embossing folders that are large enough, you can make three sets of four envelopes, one design for each of the three sets of cards, or simply move the position of the envelope flap in the embossing folder.
